

AO Scan Bio-Resonance Technology

Integrating Frequency-Based Wellness with Podiatric Care

At Knoxville Foot Doctor, we go beyond treating symptoms — we look at the **whole person**. That's why we've incorporated the **AO Scan by Solex**, a non-invasive digital biofeedback tool designed to support **neuromuscular balance**, **digestive health**, and **metabolic awareness** — all key elements for **foot and ankle wellness**, especially in chronic pain and diabetic patients.

What is the AO Scan?

The AO Scan is a **bio-resonance frequency scanning device** that evaluates and optimizes the body's energetic patterns. It works by reading subtle electromagnetic signals and comparing them to a database of healthy vibrational patterns for organs, tissues, and systems.

This technology is non-invasive, radiation-free, and can provide a snapshot of the body's energetic function in under 15 minutes.

Why Use AO Scan in Podiatry?

Chronic foot and ankle issues are often tied to **systemic imbalances** such as:

- Poor circulation
- Inflammation
- Metabolic dysfunction
- Diabetic stress
- Hormonal imbalance
- Nutritional deficiencies

The AO Scan helps us assess **contributing factors** beyond the foot — empowering our patients to take an active role in healing from the **inside out**.

Applications in Our Practice:

- **Peripheral Neuropathy Support**
Identify energetic stress patterns related to nerve health, circulation, and detox pathways.

- **Post-Surgical Recovery Optimization**
AO Scan can identify areas where the body needs extra support after surgery or trauma.
- **Pain & Inflammation Screening**
Recognize stress patterns contributing to chronic foot or joint pain, even when conventional imaging is normal.
- **Metabolic & Dietary Guidance**
Help customize a **wellness nutrition plan** based on energetic stress in the gut, liver, pancreas, and more — important for diabetic and pre-diabetic patients.
- **Wellness Check-Ins**
Patients in our Stargate Clinic wellness program may use the AO Scan to track energetic improvement alongside therapies like **LifeWave patches**, **laser**, and **orthotics**.

Scan Types We Offer:

- **Vitals Scan** – energetic frequencies for major body systems
- **Comprehensive Scan** – organ, tissue, and cellular stress scan
- **Inner Voice** – analyzes vocal tone to generate personalized sound therapy
- **SEFI** – frequency imprinting for targeted support

Disclosures:

- AO Scan does **not replace medical diagnosis or lab work**
- It is used for **wellness support and energetic evaluation only**
- No claims are made to treat or cure disease
- It is not used to diagnose diabetic neuropathy or vascular disease

Interested in an AO Scan Wellness Visit?

AO Scan evaluations can be scheduled alone or as part of a **neuropathy, pain, or diabetic care plan**. Each visit includes a printed or emailed report and personalized explanation.
